JOB EXPERIENCE

Web Front-end Intern, Wavelet Solutions, Malaysia Jan 2021 - June 2021

`TypeScript/Angular/Ionic/Redux/SQL/Postman`

- Implemented a responsive UI using Ionic components for the e-commerce website that is used by retail chain stores such as OneLiving and Clicknet
- Developed the functionalities for each web page such as integrating GoogleMap API into shipping address page and implementing print functionality in the order page
- Refactored the code using Angular Redux such as creating state for profile to automatically update the edited information once the user save it
- Tested the API endpoints with Postman and performed Get/Put/Post request to read/write the data

AWARDS

Monash High Achiever Award 2019 - 2021

- Achieved an average score of 80% and above for each semester at university

Ranked 36 in Programming League Final Round Competition 2020

- Participated virtually in a competitive programming contest where a team of 3 attempted to solve algorithmic problems

High Distinction for Semester 1 & 2 Units Result 2019

EDUCATION

Bachelor of Computer Science, Advanced Computer Programming, Monash University, Malaysia 2019 - 2022

`GPA 3.875`

- Final Year Project - Advertisement Decoder is an improvised Faster R-CNN object detection model that combines the text embedding with the image features and predicts the symbolic regions of the images
- Units Taken - Algorithm and Data Structure, Object Oriented Programming, Parallel Programming, Programming Paradigm, Database

Monash University Foundation Year, Sunway College, Malaysia 2017 - 2018

Taipei Municipal Nan-Hu High School, Taiwan 2013 - 2016
